It is my understanding that this document assigns directly to my attorney in-fact, the powers to collect all sums due said attorney-in-fact as a result of treatment to me the same as if I myself, were making such claims.

NEW PATIENT INSTRUCTIONS

Thank you for your confidence in our office. You have placed your health problems in the hands of Crosby Chiropractic and Acupuncture. Please read and follow these instructions:

- Explain every change in your symptoms to the Doctor.
- Plan your schedule so that you will be able to keep your appointments. This is extremely important in your treatment plan.
- After your first treatment, you may notice some soreness. This is to be expected. We are making changes to your spine and the body needs to adapt to these changes.
- Do NOT take your neighbors' and friends' advice for a "quick cure." Their suggestions cost you nothing and
 usually worth just that.
- Don't become discouraged if you see little improvement at the beginning of your treatment.
 - Some patients respond faster than others and your doctor will be honest with you about what you can anticipate.
- Don't use home remedies of self-medications without informing your doctor.
- As you begin to feel better, share your joy with friends. The highest compliment the Doctor can receive is a referral from you.
- Read the Chiropractic literature you are given. It will help you understand your recovery process and you will be able to help friends determine whether or not chiropractic care can be advised for them.
- During your treatment, your doctor may give you some at home therapeutic exercises. These are an integral part
 of your treatment program and you should do them as instructed. Failure to do so can slow down your healing and
 may jeopardize your ultimate healing.
- Following your release, it is recommended that you schedule periodic appointments for a spinal check-up. It is wise to make sure your spine and nervous system are properly aligned.
- Do bring your children in for spinal check-ups. Many spinal conditions are hereditary and when detected early, can result in no problems later in life.
- Resist the urge to "pop" your own spine or allow your friends to "crack your back." You are paying for the expertise
 and knowledge of the doctor. You deserve no less for yourself. Let her locate the problem and make the proper
 corrections.
- Regardless of your health problems or concerns, consult with your doctor first. If the problem is not a chiropractic one, they will refer you to the correct health care provider for your concerns.
- If you have any questions, please do not hesitate to discuss them with your doctor.
